Who can participate in the adolescent clinical trial?
The study is accepting children and adolescents ages 8-18 who have had T1D for less than 1 year.

Who can participate in the adult clinical trial?
The study is accepting adults ages 18-45 who have had T1D for 3 years or less.

What is the purpose of these research studies?
These studies will help to determine if the probiotic *Lactobacillus johnsonii* N6.2 has a positive impact on gastrointestinal health and general wellness for individuals with T1D.

All participants from both studies:
- Must be willing to consume a probiotic daily for 24 weeks
- Must be willing to have their blood drawn on 4 different study visits
- Meet other study eligibility requirements
