

# A G E N D A

**8:00 am**                      **Registration Opens and Exhibitor Fair**

---

**9:00-9:50 am**              **Kodlak Auditorium**      **JDRF Mission Keynote**  
Gary Scheiner, MS, CDE — Owner and Clinical Director of Integrated Diabetes Services  
*Gary Scheiner, MS, CDE Owner and Clinical Director at the Integrated Diabetes Services LLC will share insights into research and how JDRF is working towards a world without T1D.*

---

**9:50-10:00 am**            **Break with Exhibitors**

---

**10:00-10:50 pm**        **St. Helens Room**        **Addressing Burnout In Caregivers (because diabetes sucks for you, too)**  
Cassady Kintner, MS, LMFT  
*Being on the front lines of your loved one's care team can be exhausting, frustrating and downright frightening. In this session, we will talk about the keys to avoiding and treating burnout in caregivers because when one person in the family gets a T1D diagnosis, everyone is affected.*

---

**10:00-10:50 am**        **Rainier Room**            **Progress Against One Is Progress Against Them All — BRI's Race Against Autoimmune Diseases**  
Jane Hoyt Buckner, M.D. — President & Director, Translational Research at Benaroya Research Institute at Virginia Mason  
*The Benaroya Research Institute is in a race against autoimmune diseases. In this session learn how BRI is studying multiple autoimmune diseases and accelerating discoveries that will help predict, prevent, reverse and cure diseases of the immune system.*

---

**10:00-10:50 am**        **Baker Room**            **Understanding the Different Faces of T1D (or IS it T1D?)**  
Irl B. Hirsch, M.D. — Professor of Medicine at University of Washington  
*We now understand that not all T1D is the same. Childhood-onset is often different from those diagnosed in adolescents or young adulthood, and what is seen with newly diagnosed patients who are older may also be different. Now with genetic testing we are also learning some diagnosed with T1D may actually have another type of diabetes, and some examples will be shown.*

---

**10:50-11:00 am**        **Break with Exhibitors**

---

**11:00-11:50 am**        **St. Helens Room**        **When Possibility Becomes Reality: TrialNet Results from the First Ever Study to Delay T1D.**  
Michelle So, M.D. — Senior post-doctoral research associate, Benaroya Research Institute at Virginia Mason  
*Every year there are new scientific discoveries that drive human studies aiming to delay the onset and ultimately prevent T1D. This session will present an update on the first-ever human study, conducted by Diabetes TrialNet, that delayed the onset of type 1 diabetes in high-risk individuals. It will also provide an overview of the other interventions currently being studied that similarly hold potential to change the course of the disease.*

---

**11:00-11:50 am**        **Rainier Room**            **A Possible Path to a Functional Cure for Diabetes**  
Timothy J. Kieffer Ph.D., FCAHS — Professor, University of British Columbia  
*Diabetes results from insufficient production of insulin from pancreatic beta cells. Islet cell transplant has clearly demonstrated that it is possible to restore good glucose control in patients living with diabetes. This finding has fuelled efforts to make an unlimited supply of beta cells from human stem cells, and clinical trials are now underway in the USA and Canada in which pancreatic cells produced from stem cells are being implanted into patients. Current findings and future challenges along the path to a cell therapy product will be discussed.*

# A G E N D A

<b>11:00-11:50 am</b>	<b>Baker Room</b>	<b>You and JDRF: How You Can Make an Impact in the T1D Community</b> Keith Overa, Joe Brogan, Graham Gritsoll, Tanya Lingle <i>Learn from peers and T1D advocates in the community as they discuss making connections in the T1D community and how everyone can benefit from building relationships and making an impact.</i>
<b>11:00-11:50 am</b>	<b>Hood Room</b>	<b>Sports/Exercise and BG Control</b> Gary Scheiner, MS, CDE — Owner and Clinical Director of Integrated Diabetes Services <i>People with T1D engage (and excel!) in a variety of sports. Given that glucose control influences athletic performance, this program focuses on strategies for managing blood sugar during all levels of exercise, from general daily activity to heavy competition.</i>
<b>12:00 pm</b>	<b>McKinley Room</b>	<b>Lunch and Exhibitor Fair/Inspirational Keynote</b> Sean Busby — Founder & Executive Director, Riding on Insulin <i>Sean is the founder and executive director of an international nonprofit, Riding On Insulin (<a href="http://ridingoninsulin.org">ridingoninsulin.org</a>), which hosts action sports camps for kids and teens living with type 1 diabetes. As a long term Omnipod® Insulin Management System user, Sean truly lives an active, untethered life of adventure.</i>
<b>1:00-1:50 pm</b>	<b>Rainier Room</b>	<b>Building on the Shoulders of Giants: How Tidepool Loop is Building on the #WeAreNotWaiting Movement</b> Shawn Foster — Quality Assurance Engineer, Tidepool <i>A group of people with diabetes and parents of kids with diabetes came together and created the #WeAreNotWaiting movement, creating do-it-yourself automated insulin delivery systems. Nonprofit Tidepool is taking one of those systems forward through the FDA's regulatory system. Get an inside scoop on this unprecedented process!</i>
<b>1:00-1:50 pm</b>	<b>Baker Room</b>	<b>JDRF's T1D Advocacy Priorities</b> Jacqueline LeGrand — Manager, Health Policy, JDRF Advocacy <i>The JDRF Advocacy team is working to improve health insurance coverage for everyone with T1D. We will discuss our efforts to improve insurance coverage, lower the cost of insulin and help people have access to the latest diabetes technology.</i>
<b>1:00-1:50 pm</b>	<b>St. Helens Room</b>	<b>Living in the T1D Renaissance: How Social Media &amp; Technology Make this the Best Time to Live with T1D</b> Rob Howe — Founder, Diabetics Doing Things Podcast <i>We're living at the intersection of Diabetes Technology &amp; Social Media connectivity, which make today the best time to live with Diabetes (if there is such a thing). Rob talks about the clinical &amp; psychosocial outcomes of being involved with the Diabetes Online Community, from sharing blood sugars, to Diabetes hacks, and making friends with T1Ds across the world.</i>
<b>1:50-2:00 pm</b>	<b>Break with Exhibitors</b>	
<b>2:00-3:00 pm</b>	<b>Kodiak Auditorium</b>	<b>Inspirational Keynote: Overcoming Obstacles</b> Eric Tozer — President & Co-founder of Diabetes Sports Project and T1D Athlete Ambassador <i>Completing the World Marathon Challenge — 7 marathons, 7 Continents in 7 consecutive days, with T1D. This session aims to provide inspiration and education to those who impacted by T1D.</i>
