JDRF IMPROVING LIVES, CURING TYPE 1 DIABETES.

ABOUT TYPE 1 DIABETES

Type 1 diabetes (T1D) is an autoimmune disease that, without warning, strikes people of all ages, from infancy through adulthood. T1D has nothing to do with diet or lifestyle and it cannot be prevented. T1D occurs when the body's immune system attacks and destroys the insulin-producing cells in the pancreas. Insulin is essential for survival. At present there is no cure. T1D causes lifelong dependency on insulin injections or insulin pump therapy and 24/7 management of blood sugar levels through finger pricks and blood glucose monitoring systems. It requires intensive, never-ending management and carries the weight of life-threatening complications.

ABOUT JDRF

JDRF is the leading global organization funding T1D research. JDRF's goal is to reduce the impact of diabetes on people's lives and keep diabetics healthy until a cure(s) are found.

JDRF collaborates with a wide spectrum of international partners and is the only organization with the scientific resources, regulatory influence, and a working plan to bring life-changing therapies from the lab to the T1D community. JDRF is the organization that will turn #TypeOneIntoTypeNone.

We are sending you BACK TO THE FUTURE at the 25th Annual Promise Ball on Saturday, May 11, 2024. Both events will be held at the beautiful and newly renovated Hyatt Regency Hill Country Resort & Spa.
