

JDRF T1D LOOKS LIKE ME™

5,055  **DAYS LIVING WITH T1D**

2,881  **HOURS SLEEP LOST**

28,505  **FINGER PRICKS**

11,375  **INSULIN PUMP SITE CHANGES**

Jordan Morris *diagnosed at age 9*

Jordan Morris, forward for Seattle Sounders FC, works with JDRF to raise awareness in his local community. He shares his experience living with T1D with families and kids, inspiring them to never let T1D hold them back. The numbers above are a snapshot of the burden T1D has been in Jordan's life. These numbers grow every day.

WITH TYPE 1 DIABETES, THE NUMBERS ADD UP

LIFE WITH T1D

Living with type 1 diabetes (T1D) means constant interruptions in your life. People with T1D must regularly monitor their blood-sugar levels, inject or continually infuse insulin through a pump, and carefully regulate insulin doses with eating and activity 24 hours a day, 365 days a year.

WHAT IS T1D?

T1D is an autoimmune disease in which a person's pancreas stops producing insulin, a hormone people need to get energy from food. T1D strikes both children and adults, and its onset has nothing to do with diet or lifestyle. There is currently nothing you can do to prevent it, and there is no cure.

TURNING TYPE ONE INTO TYPE NONE

JDRF supporters, advocates and volunteers drive research that transforms the lives of people with T1D. We want a cure, and we won't stop until we find one. Along the way, we will continue to accelerate scientific progress that delivers new treatments and therapies that make day-to-day life with T1D easier, safer and healthier.
