

get a **FLU SHOT** at **WALGREENS***

**This August through November,
Walgreens will donate \$1 to JDRF for every
flu shot administered to JDRF supporters.†**

A flu shot is especially important if you have type 1 or type 2 diabetes:

- Diabetes could make your immune system less able to fight the flu, and that can affect your blood-sugar levels and appetite.
- CDC-recommended for diabetes patients who are six months and older.‡

Get your flu shot at Walgreens and help support JDRF.

No appointment necessary—just bring this flyer to the pharmacy or mention that you're a JDRF member.§

For details, visit Walgreens.com/WayToWell and jdrf.org.

*Vaccine subject to availability. State-, age- and health-related restrictions may apply. Donation promotion not valid at Healthcare Clinic locations. People diagnosed with diabetes are not eligible to receive the FluMist nasal spray flu vaccine. Offer not available to beneficiaries of government health plans, including Medicare and Medicaid. †Up to \$100,000. ‡ www.flu.gov/at-risk/health-conditions/diabetes. §Flyer UPC codes are for store promotional tracking purposes only. Flu shot recipients will not be charged a \$1 donation.
