

Type 1 Diabetes: A Health Crisis by the Numbers

THE URGENCY IS CLEAR Type 1 diabetes (T1D) has a profound human, emotional, and financial burden for those who live with it and their families—and that burden is rising rapidly. With nearly 9 million people living with T1D around the world, it is one of the fastest growing, non-communicable, chronic health conditions on the planet.

In less than 20 years, the number of people impacted by T1D is projected to more than double. The largest increase is projected to be in low-income and lower-middle-income countries.

AN OPPORTUNITY TO CHANGE LIVES By bringing awareness to and taking action on the issues surrounding T1D, we can turn these numbers around. We can take action to improve and save lives through four key interventions:

MORE PEOPLE COULD BE ALIVE IN 2040

TIMELY DIAGNOSIS

668,000

Enabling better medical education and training to accurately diagnose T1D

INSULIN AND STRIPS

1.98 million

Creating barrier-free access to insulin and blood glucose testing strips

PUMPS AND SENSORS

673,000

Ensuring access to technology that automates glucose monitoring and insulin delivery

PREVENTION AND CURES

890,000

Increasing investment and research in emerging prevention, treatments, and cures
